PROFESSIONAL SUMMARY

Recent Computer Science graduate with broad IT experience spanning full-stack web and mobile development, system administration support, and data management. Skilled in building and deploying applications using React, Next.js, Node.js, and Flutter, with hands-on experience in RESTful API development, database management (MySQL, Supabase), and end-user support. Comfortable working in technical and non-technical environments — whether writing code, troubleshooting systems, managing structured data, or coordinating with teams. Eager to contribute to an IT team in a software development, IT support, or data-oriented role.

TECHNICAL SKILLS

Languages & Markup: JavaScript, Dart, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Node.js, Flutter

Databases & Data Tools: MySQL, Supabase, SQLYog — data entry, querying, structuring, and reporting

APIs & Testing: REST APIs, Postman (API testing, validation, debugging)

IT Support & Tools: Hardware/software troubleshooting, User Acceptance Testing (UAT), system documentation, Git, GitHub

Deployment & DevOps: Vercel, Heroku, Android Studio, VS Code, Cursor

AI & Productivity Tools: GitHub Copilot, Claude Code, ChatGPT, Gemini, Perplexity

Soft Skills: Team coordination, technical documentation, user training, mentoring, deadline management

EXPERIENCE

Full-Stack Developer Intern (OJT) | Bohol Island State University – Bilar Campus

June 2025 – July 2025

- Built and maintained a College of Technology Journal Document Management System using Next.js, Node.js, and SQL — enabling students to submit, manage, and retrieve thesis papers online.
- Designed and integrated RESTful APIs; used Postman for testing, validation, and debugging to ensure data accuracy and system reliability.
- Managed structured records in a relational database (MySQL/SQL), ensuring consistent data entry, integrity, and retrieval across system modules.
- Conducted system testing and User Acceptance Testing (UAT) with faculty members — collected feedback, documented issues, and implemented feature improvements.
- Prepared technical documentation and coordinated task timelines with team members to deliver the project on schedule.
- Provided informal IT assistance to faculty users, guiding them through system features and resolving basic usability issues.

KEY PROJECTS

Cuisina AI — Flutter · Node.js · MySQL · Gemini AI

play.google.com/store/apps/details?id=com.fullstack.cuisinaapp

- Developed an AI-powered mobile app for meat-type detection and automated recipe recommendations; published on Google Play Store.
- Built backend services with Node.js and managed application data in MySQL, handling structured data storage and retrieval.
- Integrated the Gemini AI API to process user inputs and return intelligent, context-aware suggestions.

CTECH X CCSET — Institutional Web Platform — Next.js

ctech.bisubilar.org

- Developed and maintained a university institutional website — managing content, pages, and structured information for the College of Technology.

Journal Document Management System — Next.js · Node.js · MySQL

- Full CRUD document system for thesis submissions — data entry, record management, search, and retrieval by authorized users.

Flex Wear — E-Commerce Web App — React · Vercel

flex-wear.vercel.app

- Built a full-featured e-commerce front-end with product listings, cart management, and a clean user interface.

LEADERSHIP & AFFILIATIONS

Lead Developer | FullStack Masters — Bohol Island State University
2024 – 2026

- Led development of multiple student-built software projects; coordinated front-end and back-end workflows.
- Mentored members in React and Node.js best practices; conducted informal training sessions.
- Organized team tasks, tracked progress, and ensured timely delivery of project milestones.

Member | Computing Society — Bohol Island State University | *2022 – 2026*

EDUCATION

Bachelor of Science in Computer Science
Bohol Island State University — Zamora, Bilar, Bohol | 2022 – 2026

Information and Communications Technology (Senior High School)
Sierra Bullones Technical Vocational High School — Sierra Bullones, Bohol | 2016 – 2022

TRAININGS & SEMINARS

- CASCADE (Caravan for Aspiring Digital Entrepreneurs) Workshop — BISU Bilar Campus | September 2025
- Tech Talks 2025: UI/UX, Mobile Development & Project Management — BISU Bilar Campus | April 2025
